# vscode

## 终端改为msys2的mingw64

注意路径不能有空格和.，一开始安装路径为 D:\MinGW\msys\2.0\usr\bin，会报错 exit code 2，表示找不到文件<sup>1)</sup>

配置<sup>2)</sup>：

snippet.json

```
"terminal.integrated.shell.windows": "D:\\msys64\\msys2_shell.cmd",  
"terminal.integrated.shellArgs.windows": ["-defterm", "-mingw64", "-no-start", "-here"],
```

上面配置换一个msys2版本可能就不能用了，可以试试下面的配置

snippet.json

```
{  
  "terminal.integrated.shell.windows": "D:\\msys64\\usr\\bin\\bash.exe",  
  "terminal.integrated.shellArgs.windows": ["-l"],  
  "terminal.integrated.env.windows": {  
    "CHERE_INVOKING": "1",  
    "MSYSTEM": "MINGW64",  
  }  
}
```

## 使用msys2的git

直接使用 会提示 没有活动的源代码控制提供程序，参见<sup>3)</sup>

snippet.bat

```
@echo off  
setlocal  
  
rem If you don't add path for msys2 into %PATH%, enable following line.  
set PATH=d:\\msys64\\usr\\bin;%PATH%  
  
if "%1" equ "rev-parse" goto rev_parse  
git %*  
goto :eof  
:rev_parse
```

```
for /f %%1 in ('git %*') do cygpath -w %%1
```
