Deepin 安装Anbox

Install kernel modules

添加源

snippet.bash

```
user@user-PC:~$ cat /etc/apt/sources.list
## Generated by deepin-installer
deb [by-hash=force] https://mirrors.aliyun.com/deepin lion main contrib non-free
deb http://ppa.launchpad.net/morphis/anbox-support/ubuntu cosmic main
```

添加key

snippet.bash

```
$ sudo apt install dirmngr
$ sudo apt-key adv --recv-keys --keyserver keyserver.ubuntu.com
CFD4CCDE77B82D4FA3B113E521C6044A875B67B7
```

安装 anbox-modules

snippet.bash

```
$ sudo apt update
$ sudo apt install anbox-modules-dkms
$ sudo modprobe ashmem_linux
$ sudo modprobe binder_linux
```

安装anbox

snippet.bash

```
$ sudo apt install snapd
$ snap install --devmode --beta anbox
```

启动（重启可以添加anbox快捷方式¹⁾）

snippet.bash

```
$ snap list
```

```
$ snap run anbox session-manager  
$ snap run launch --package=org.anbox.appmgr --  
component=org.anbox.appmgr.AppViewActivity  
$ adb install firefox.apk
```

See: <https://docs.anbox.io/userguide/install.html>
